

morswift RBV banding system

The innovative, **rubber banding solution** from MorSwift enables fast, efficient banding of **Snow crab** and **Dungeness crab**.

100% **pneumatically powered**, the RBV goes wherever you need it - whether at **sea** or on **shore**.

The MorSwift banding system uses **extruded rubber tubing made in the USA** which cuts bands as required and creates an **economical, secure** rubber band **closure** without damaging the crab.

Why MorSwift?

- Apply a rubber band enclosure every 2½ seconds
- Reduce or re-allocate labor resources by 50%
- Boost production output by over 200%
- Eliminate waste, increase overall consumable yield
- Proven technology and return on investment
- Spray down machine for easy cleaning
- Helps reduce repetitive task, work-related injury

General Specifications

Model: MorSwift Rubber Band Vertical (RBV)

Bundling Capability: 7" diameter, 24 enclosures per minute

Dimensions: 14" x 24" x 28" (LxWxH)

Weight: portable and lightweight - 98 lbs

CE certified 

Power: Compressed air (pneumatic); foot pedal actuated

Band Imprinting: Optional one color (i.e. PLU, origin, logo, etc.)

Rubber Supply: Continuous feed extruded rubber tubing

International Patent Pending

ecologically responsible banding
